Designed by Nexelec in France

# Nexelec

## Protecting residents & Secure buildings

For over fifteen years, Nexelec has been dedicated to creating monitoring, with occupant safety at the heart of its commitment.

Our ambition is to offer you an ever more reliable and innovative range of stand-alone detectors.

We are aware that fire safety is not just a goal, but an essential responsibility that our teams undertake every day with rigor and dedication.

**Frank GREARD**  
Chief Executive Officer

# Acting for the environment

---

**Nexelec's commitment** for responsible electronics. Our approach incorporates respect for the environment right from the design stage. We choose sustainable materials, reduce energy consumption and aim to increase the longevity of our devices.

## **Maximizing the lifetime of detectors**

Our products incorporate a low-power electrical architecture, extending battery life by up to 10 years and reducing the need for batteries.

## **Repairable design**

With an innovative technical configuration consisting of an electronic board and just 3 recyclable plastic parts, our detectors are designed to be repaired.

## **Optimized materials management**

The engineering of our detectors simplifies sorting center recycling, improves component recovery and supports sustainable materials management.

## **Responsible packaging**

By maximizing the use of recycled cardboard, we optimize the use of resources. For large-scale projects, our products are packaged in ECO versions, thus minimizing transport volumes and packaging waste at customer sites.

STAND-ALONE DETECTORS

# A complete & powerful range

Nexelec offers a wide range of intelligent detectors to meet the specific needs of professional customers.

Our products are designed to be simple to install and use, while incorporating the latest technologies.

Our R&D team develops reliable, cutting-edge solutions compatible with various IoT connectivities.

**PRO**

**Stand-alone detectors**  
Professional range

# The different types of detectors

---

## SMOKE DETECTORS

### Recommendations

Recommended for all dwellings

### Installation recommendations

On every floor, in corridors, bedrooms and living rooms

## CO DETECTORS

### Recommendations

Strongly recommended for homes with fuel-burning appliances

### Installation recommendations

Every room with a fuel-burning appliance

## HEAT DETECTORS

### Recommendations

Strongly recommended in rooms where a smoke detector cannot be installed

### Installation recommendations

Kitchen, garage

# Quality & Fiability

## European standards

All our products are CE certified. As part of our continuous improvement process and our commitment to superior quality, Nexelec carries out ongoing checks and tests to ensure that its detectors comply with the essential requirements defined in the relevant European legislation.

### SMOKE - EN14604

Standard EN14604 specifies the requirements, test methods and performance criteria for smoke alarm devices in domestic premises. It is mandatory in Europe for smoke detectors.

### CO - EN50291

Standard EN50291 specifies the requirements, test methods and performance criteria for CO alarm devices in domestic premises. It is mandatory in Europe for carbon monoxide detectors.

### HEAT - EN54-5

Standard EN54-5 specifies requirements, test methods and performance criteria for heat alarm devices in domestic premises. It is mandatory in Europe for heat detectors.

## NF292: French quality brand

Some of our detectors are certified NF292, a french quality mark issued by AFNOR Certification, an independent organization that regularly inspects smoke and carbon monoxide detectors. NF292 - Sécurité Incendie Domestique certification enables Nexelec to prove that its products comply with current standards, as well as with the technical and quality requirements specific to the NF standard. Nexelec thus guarantees the reliability of its detectors, based on the most demanding quality criteria on the market.

# Innovations & Technologies

## Electronic Maintenance Certificate\*

### Guaranteeing regulatory compliance for landlords

In certain situations, the landlord is responsible for the maintenance of smoke detectors. The electronic maintenance certificate provides security for the landlord, enabling him to certify that the smoke detector has been serviced regularly and operating correctly

### Reliable maintenance of detectors

After each maintenance operation, a unique, forgery-proof certificate is recorded in the product's secure NFC chip. The operator can thus certify that the detector has been properly serviced (annual cleaning + operating test)

\*Option available according to part number. See detailed datasheets

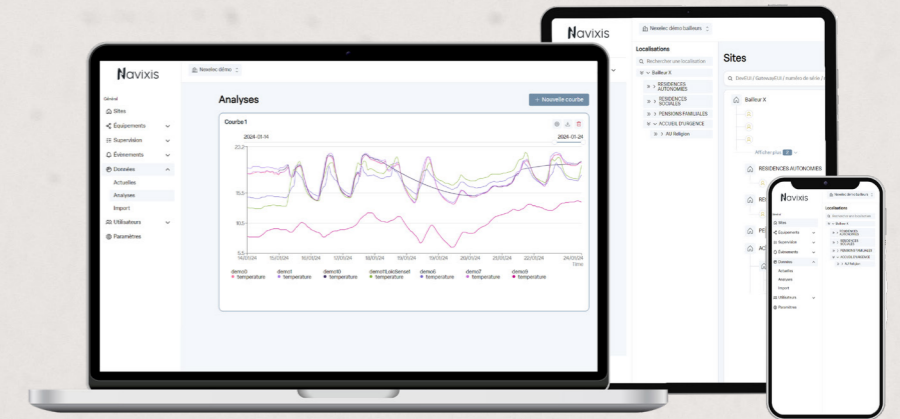

Discover technology

QR Code for traceability

NAVIXIS detector tracking application

## Digital detector logbook

QR Code laser-marked on each detector + NAVIXIS application to track the installation and complete maintenance of a fleet of detectors.

NAVIXIS is an online software application that integrates a digital logbook for tracking detectors, specifically designed to meet the needs of landlords and building maintenance specialists.

### Easy fleet management

Information is stored and accessible online for simplified, centralized monitoring of a fleet of several thousand products

### Complete detector history

Traceability of installation and maintenance of each device: useful information for insurance purposes or regulatory inspections

### Automated plant monitoring

The digital logbook can be configured to send reminders when it's time to check or replace detectors

### API and software connectors

The digital notebook integrates easily with your favorite management software thanks to our APIs and dedicated connectors

Discover technology

Discover technology

## Interconnected sensors and accessories\*

Each detector in our (inter)connected range is equipped with a wireless communication module. The devices use radio frequencies to exchange information between detectors in the same network, or with dedicated accessories.

### Network of interconnected detectors

- ☐)))☐ Compatible with ALERT device for the deaf and hearing-impaired

### Compatible with REMOTE remote control

- ☐)))☐ Remote control of ceiling-mounted detectors. A single remote control can operate detectors in all homes

### Compatible with ALERT device for the deaf and hearing-impaired

- ☐)))☐ Alarm with strobe flash and vibrating cushion. Relays alarms from detectors up to 300 meters in open field

- ☐)))☐ Radio range: 150 meters indoors

- ☐)))☐ Up to 25 interconnectable sensors and accessories

\*Option available according to part number. See detailed datasheets

## Connected detectors\*

A Nexelec connected smoke detector ensures early detection of fires, while offering remote monitoring and personalized alerts for complete protection of the home and its occupants.

### Remote maintenance without entering the home

- ☐)))☐ Be alerted in real time to detector faults, low batteries or other critical parameters. Simplify the management of your thousands of detectors, while ensuring the safety of your residents

### Optional remote monitoring

- ☐)))☐ When a fire breaks out, the product triggers an audible alarm to alert the occupant locally. Our connected detector is initially programmed not to transmit fire alarms to the landlord. If you wish to react to these warnings or carry out checks, you can adjust the device's settings or call in the services of an approved authorized remote monitoring company

All our connected sensors use open, standardized and secure IoT radio protocols.

\*Option available according to part number. See detailed datasheets

Discover technology

# The 1st detector that combines Safety & Energy Savings

Some of our detectors combine the essential functions of a fire detector with the advantages of a temperature and humidity sensor.

The device provides effective monitoring of ambient conditions in the home, while guiding you towards energy-saving measures and improved indoor air quality.

## Connected detector

Remote maintenance of the appliance without entering the home

## Temperature and humidity under control\*

Measures home environment parameters

## Building energy efficiency

By monitoring and adjusting the temperature according to actual needs, energy consumption can be optimized. Each degree less heating can reduce energy bills by 7%\*\* , promoting a more efficient use of resources and reducing environmental impact

## Preventing mold in the building

Prevent mold in the home by measuring humidity with our detectors. High humidity can cause health risks and structural damage. Early detection can anticipate mold growth, making it easier to take corrective action

## Measurement accuracy

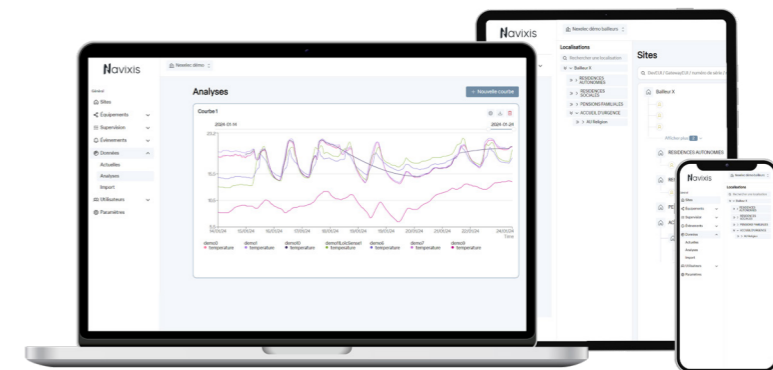

Temperature sensor calibration certificate issued by an independant metrology laboratory. Typical accuracy:  $\pm 0.2^{\circ}\text{C}$

## Detectors approved for wall mounting

For reliable temperature and humidity measurement, wall-mount the device between 30 and 60 cm from the ceiling

## NAVIXIS temperature / humidity monitoring application

\*Option available according to part number. See detailed datasheets

# SMOKE DETECTORS

# SMOKE

## Installation tips\*

### Configuration

#### Mandatory

One smoke alarm per home

#### Minimal

A smoke alarm on every floor

#### Recommended

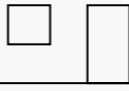

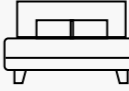

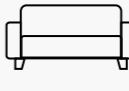

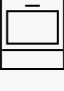

Add a smoke alarm in the living room and a heat detector in the kitchen

#### Optimal

Add a smoke alarm in each bedroom and a heat detector in the garage

\*Detector configuration, installation and mounting may differ from country to country. Be sure to consult the relevant regulations to ensure proper installation.

### Installation

 <p>Stairwell</p> <p>Mandatory</p>	 <p>Attic</p> <p>Recommended</p>	
 <p>Corridor</p> <p>Mandatory</p>	 <p>Bedroom</p> <p>Recommended</p>	 <p>Washroom</p> <p>Not recommended</p>
 <p>Garage</p> <p>Not recommended</p>	 <p>Living room</p> <p>Recommended</p>	 <p>Kitchen</p> <p>Not recommended</p>

### Mounting

#### Wall or ceiling mounting

Install the detector on the ceiling in the center of the room, at least 50 cm from corners, walls, beams or any other obstacle.

Install the detector on the wall, between 30 and 60 cm from the ceiling.

#### Sloped ceiling mounting

Install the detector more than 50 cm from any corner of the room.

# SMOKE Functions

Net weight: 150 g (including battery and stand)

## SLEEK, MODERN DESIGN

The design of our detectors blends into any interior. The range is characterized by pure, sober lines. Textured white emphasizes the elegance of the product's rounded shapes. On the front, the large touch-sensitive button is designed for easy access.

Sound and light alarms are also optimized: the discreet integration of the buzzer and LED on the front panel ensures excellent alarm diffusion.

### Design

Facilitates acceptance of the detector by residents

### Warranty

5 years

### Digital logbook

QR Code + Detector installation and tracking application

### Powerful audible alarm

85 dB at 3 metres for rapid alerting of occupants

### Rip-off protection

Lockable mounting base to reduce the risk of detector removal in rental accommodation

### Reduce false alarms

Electronic self-compensation for dust in the detection chamber

### TEST

### Test/Silence button

Large, easy-to-reach touch button on front panel

### Compact mounting base

Only 3 cm in diameter to avoid damaging the substrate

### Air 360°

Exclusive smoke detection technology. Simplifies maintenance for residents

### Insect barrier

Pest protection grid integrated into the detector

### LED indicator

Discreet LED indicator in standby mode, powerful in alarm mode

### 8h beep delay

Temporarily silences fault beeps until detector is replaced

## SMOKE

# Which detector to choose?

A smoke detector can quickly detect the start of a fire, triggering an audible alarm to warn occupants and ensure safety by encouraging a rapid response.

The **electronic maintenance certificate** simplifies tracking of detector testing and maintenance operations, providing landlords with clear proof of compliance with their regulatory obligations.

**Radio-connected detectors** can be remotely controlled, offering more convenient management of a housing stock and integration with other intelligent devices to enhance overall home security.

# CO DETECTORS

CO

# Installation tips\*

## Configuration

### Minimal

One CO alarm per floor. In rooms with fuel-burning appliances In rooms with heating ducts

### Recommended

Add a CO alarm in each bedroom and in the busiest living areas

### Optimal

Add a CO alarm in the garage

\*Detector configuration, installation and mounting may differ from country to country. Be sure to consult the relevant regulations to ensure proper installation.

## Installation

 Stairwell Optional	 Attic Not recommended	
 Corridor Optional	 Bedroom Recommended	 Washroom Not recommended
 Garage Recommended	 Living room Recommended	 Kitchen Recommended

## Mounting

### Wall mounting

Install the detector on the wall at a distance of over 30 cm from the ceiling.

### Precautions for wall or free-standing installation

Position the detector within 2 to 4 meters of fuel-burning appliances.

# CO Functions

Net weight: 150 g (including battery and stand)

## ADVANCED CO SAFETY

Carbon monoxide is a totally odorless and colorless gas that can be fatal. Every minute counts to alert occupants in the event of danger. Our carbon monoxide detectors feature a pre-alarm function that is essential for protecting occupants. Above 40 ppm, a red light flashes every 30 seconds on the device to warn residents. If the CO level does not fall after a certain time, the audible alarm is triggered to enable ventilation and evacuation of the premises.

### Design

Facilitates acceptance of the detector by residents

### Warranty

5 years

### Digital logbook

QR Code + Detector installation and tracking application

### Powerful audible alarm

# SECURE

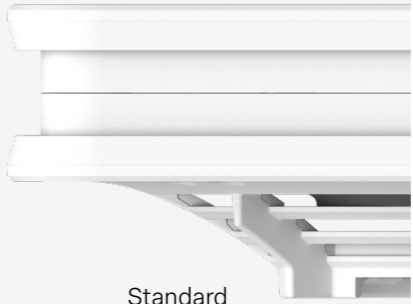

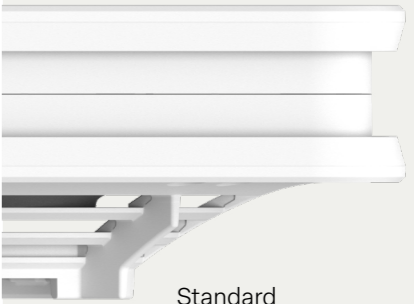

Carbon monoxide detector

 10-year sealed battery

## RELIABLE AT ANY TIME

Carbon monoxide (CO) is a colorless, odorless and tasteless gas that is extremely hazardous to human health. It is produced by the incomplete combustion of fuels such as natural gas, coal, oil, wood and other combustibles. Our carbon monoxide detectors are designed to operate optimally for 10 years, reacting quickly to the slightest indication of danger.

# HEAT DETECTORS

# HEAT

## Installation tips\*

### Configuration

#### Minimal

A heat alarm in the kitchen

#### Recommended

Add a heat alarm in the garage

#### Optimal

Add a heat detector in rooms where smoke detectors cannot be installed

\*Detector configuration, installation and mounting may differ from country to country. Be sure to consult the relevant regulations to ensure proper installation.

### Installation

 Stairwell Not recommended	 Attic Recommended	
 Corridor Not recommended	 Bedroom Not recommended	 Washroom Not recommended
 Garage Recommended	 Living room Not recommended	 Kitchen Minimal

### Mounting

#### Ceiling mounting

Install the detector on the ceiling in the center of the room, at least 50 cm from corners, walls, beams or any other obstacle.

#### Precautions

Place the detector within a 5-meter radius of potential fire sources.

To avoid false alarms, keep the detector away from heating appliances when in use.

# HEAT Functions

Net weight: 150 g (including battery and stand)

## ELEGANT DESIGN

Most residents consider heat detectors to have an imposing, non aesthetic design. Our product combines technology with a modern, minimalist design that blends harmoniously with any interior décor.

# COMPLEMENTARY PRODUCTS

# Innovations & Technologies

## REMOTE controls detectors

Need to test or stop your detector's alarm?

The REMOTE remote control makes it easy.

For people with Reduced Mobility, the elderly or high-rise homes, the REMOTE remote control makes it easy to control ceiling-mounted connected detectors.

### Remote control

No need for steps to access detectors. Remote control for easy device testing

### Locates fire alarms

Identifies the product at the origin of an alarm if several interconnected detectors sound simultaneously

### Simplifies testing and maintenance for professionals

TEST A single remote control, for example, can be used to test all the detectors in a building quickly and efficiently, without having to climb ladders or handle each device individually

## ALERT warns occupants

Equipped with configurable indicator lights and an audible alarm, ALERT is a device specifically designed for the deaf and hard-of-hearing.

### Interconnected with detectors

ALERT incorporates a wireless radio communication module. When a detector triggers an alarm, ALERT reacts instantly, activating a powerful flash of light and an audible alert

### Flashing light

Visual indicator to draw residents' attention in the event of a fire or CO alarm

### Powerful audible alarm

110 dB at 3 metres to effectively warn occupants

### Vibrating cushion compatible

The VIBRATE vibrating cushion (optional) is placed under the pillow to wake the resident if the ALERT light and sound alarms are not heard

# RELAY controls boilers

How to ensure the safety of occupants in the event of carbon monoxide detection?

Incidents of incomplete combustion of gas, oil or wood can lead to dangerous emissions of CO, an odorless and potentially fatal gas.

-  **Radio interconnection with CO detectors**  
In the event of an abnormal presence of CO, our carbon monoxide detectors equipped with a radio module communicate with RELAY, which automatically cuts the boiler's power supply in just a few seconds, thus interrupting its operation
-  **Remote maintenance without entering the home**  
Be alerted in real time to individual boiler malfunctions. Simplify management of your fleet of several thousand boilers, while ensuring the safety of residents
-  **Maximum safety**  
RELAY significantly enhances safety in homes with individual gas, oil or wood-fired boilers
-  **Risk prevention**  
Automatic boiler shutdown prevents serious hazards, including fatal health risks for residents exposed to prolonged exposure to carbon monoxide

## Adhesive fastener

Fixing a detector with screws and plugs sometimes comes up against technical constraints. Our exclusive installation system provides a reliable, approved solution!

-  **3M adhesive fastener**  
Avoids drilling into walls and ceilings and replaces screws and plugs, which is particularly useful in the presence of asbestos, pipes or cables
-  **CE and NF-approved installation device**  
Adhesive mounting specially designed for Nexelec smoke or carbon monoxide detectors certified EN14604 / EN50291 and NF292
-  **Reliable and robust**  
Laboratory-tested adhesive. Very high peel strength. To be used exclusively with Nexelec detectors mounting bases

## Universal mounting base

Do you need to install Nexelec smoke detectors to replace other brands?

MOUNT and MOUNT+ universal mounting bases are designed to be compatible with a wide range of detector mounting holes of different makers and models.

-  **Quick installation**  
It takes just 1 minute to unscrew the base from the old detector and screw on a new MOUNT or MOUNT+ base in its place
-  **Rip-off protection**  
Lockable mounting base to reduce the risk of detector removal in rental accommodation
-  **TAPE adhesive compatible**  
Adhesive mounting system for Nexelec detectors certified to EN14604 / EN50291 and NF292

# QR'SAFE simplifies the use of detectors for residents

Would you like to raise residents' awareness of fire risks, while providing them with clear information on how to use and maintain their detectors?

QR'SAFE is a useful complement to the detector's user manual, making it easy to access information simply by scanning a QR Code.

- Increased awareness of fire risks
- Simplified access to essential information
- Practical addition to user manual

## Enhanced safety

QR'SAFE is a QR Code label to be stuck near the detectors so that occupants can learn how to use them optimally thanks to our advice

## Information always available

Residents simply scan the QR Code to access an online web page with all the information they need about their detector: operation, use, test frequency, maintenance, downloadable instructions, videos, etc.

## A single QR code for all detectors

Minimize the risk of errors when affixing labels near detectors: QR'SAFE fits all detectors in the Nexelec range!

## Easy to install

Apply and remove the label without damaging the substrate, thanks to a highly effective removable adhesive for clean removal from most surfaces
